Weekly Planner Pro: User Guide

File

Weekly_Planner_Pro.xlsx (Excel 2019 or Microsoft 365). Eight tabs, no macros. Week 1 has demo entries.

Getting started

- Open Setup. Enter your name, the first Monday of your planning, working hours, and water and exercise goals.
- Edit the habit list and the dropdown lists in the blue cells.
- Open Week 1. Clear the demo entries (blue cells) and enter your own.

Each week tab

- Overview: week number and dates are automatic. Enter the main goal and three priorities.
- Daily planning: for each day, enter the top priority and appointments, then five task rows with priority, time, Done? and notes.
- Trackers: habit grid (Done / Missed), water glasses, exercise minutes, and productivity per day.
- Reflection: wins, challenges, lessons and focus for next week.
- Need more than five tasks a day? Use the Notes field, or copy the week tab.

Monthly calendar

- Choose the month and year. Add important dates and deadlines in the lists on the right.
- Weekly goals are pulled from the Week tabs.

Reusing weeks

Copy a week tab to repeat a week. Changing the first Monday on Setup moves all six week tabs.

Troubleshooting

- Grey cells are calculated. Do not type over them.
- Weekday names follow the language of your Excel install.
